Art Unit: 3682

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 and 18-23 are rejected under 35 U.S.C. § 102(a), as being anticipated by Uchiyama et al. The examiner finds all claimed subject matter to be present.

See col. 5, lines 44-51 and 61-63. See col. 5, line 26 for resin and col. 6, lines 10-12 for viscosity. The cage oil percentages are considered to generate volume percentages overlapping those claimed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-17 and 24-25 are rejected under 35 U.S.C. § 103 as being unpatentable over Uchiyama et al. as set forth in the rejection

Art Unit: 3682

of claims 1-9 and 18-23 above, and further in view of official notice of common knowledge in the art.

The examiner finds that it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a ball bearing in a hard disk drive to facilitate its rotation and provide significant load-bearing capacity. See Mouri et al. Element 9a is an "actuator".

Applicant's arguments have been fully considered but they are not deemed to be persuasive.

As requested, a reference has been cited in support of the official notice rejection.

The argument regarding how the oil is injected into the bearing is a process limitation has carries little weight in an article claim.

In response to Applicant's arguments, 37 CFR § 1.111(c) requires applicant to "clearly point out the patentable novelty which he thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. He must also show how the amendments avoid such references or objections." In this case, applicant has failed to clearly point out patentable novelty and failed to show how the amendment avoids the combination of references applied against the claim.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

Art Unit: 3682

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
